## Gridding ceiling recessed inear module for continuous light pattern design from the Mosaic TROLL family.

### DESCRIPTION

Gridding ceiling recessed linear module for continuous light pattern design from the Mosaic TROLL family. Luminaire set an advanced and innovative thermal balance system through passive dissipation with stable colour temperature of 4000° K (cold white) optimised to be used as general lighting in offices, Schools, commercial centres etc. Luminaires has been designed to be recessed in suspended gridding ceilings. Luminaire housing is made of steel sheet, coated with white (RAL 9016) powder paint resistant to UV. Luminaire build in a PMMA opal diffuser and high efficiency LED light sources with CRI higher than 85 % and a chromatic dispersion lower than 3 SMCD which can work at 8w or 13W depending on the gear we use. Fixture has a luminous flux of 1044/1767 Lm, with an efficiency of 95/110 Lm/W and a total consumption of 11/16 W. The average life for the luminaire is 60000 (L80B10) h (established at a minimum flux of 70 % from the original). Luminaire needs an auxilliary gear on/off fed at 220-240V; 50/60 Hz.(see accessories).
